

# KIT EVO

## FEATURES

The LANDIRENNO EVO system is one of the world's best-selling LPG systems due to its outstanding price to quality ratio. Its compact size makes it suitable for the vast majority of vehicles.

The components selected for the system are among the quietest and smallest available, guaranteeing easy installation and high performance. The system is subjected to strict endurance tests to guarantee maximum quality and efficiency over time.

It is designed for vehicles with 2 to 6 cylinder engines, including turbo engines.

The LPG system is compatible with the strictest emissions standards (Euro 6).

LANDIRENNO EVO features OBDII connectivity via the K and CAN protocols for complete, accurate diagnostics of the gas system. The OBD version of the system supports the LANDIRENNO CONNECT smartphone app. The app provides information on consumption, autonomy, emissions and more.
